Aztec Siratro

Aztec Siratro.

Aztec Atro is a rust resistant Siratro released by the CSIRO. It requires a moist, warm tropical or subtropical climate receiving 800-1200mm annual rainfall

Aztec Atro is ideal for pasture mixes, with excellent spring growth and superior growth and vigour to Siratro in the colder months

1. Rust resistant twinning legume
2. High yields of palatable high protein forage
3. Versatile with cool season growth and long term persistence.
