Finecut Rhodes Grass

### Finecut Rhodes Grass

Finecut was selected primarily for improved grazing and hay production.

It is extremely fine stemmed, leafy and early flowering in addition to having higher dry matter yields than competitive varieties. It is a summer growing grass which spreads to form a dense mat over the ground, binding the soil and assisting in the prevention of erosion.

- \* Produces good body of fine leafy feed
  - \* Creeping habit reduces erosion
  - \* Tolerates salty conditions
  - \* Uniform growth and maturity for better hay production.
- 
- \* Bisset Creeping Bluegrass
  - \* Medway
  - \* Finecut Rhodes Grass
  - \* Topcut Rhodes Grass
  - \* Aztec Siratro
  - \* Dawson Creeping Lawngrass
  - \* Riel Forage Oats
